

CIPHERVOICE

Flexible, reliable & scalable unified communication platform.

Having to deal with the high cost and hassle of traditional telephone is a thing of the past.

CipherWave offers an all-inclusive, unified communications package to meet the demanding communication needs of growing businesses. And it's easy to use.

This feature-rich hosted PBX solution delivers cutting-edge VoIP (Voice over Internet Protocol) technology and is fully customisable, giving you the power to pick and pay for only the exact features that you need.

In addition to the standard features of all new generation PBXs, CipherWave's PBX solution includes comprehensive enhanced services, telephony applications, system administration, end user applications, and setup and configuration features in a truly scalable manner.

Our internal technical expertise paired with the fact that we own and manage our data centre, network and IPs, gives us greater control to give you superior service.

BUSINESS BENEFITS

- Cost effective alternative to making traditional telephone calls
- No need to own and manage PBX hardware
