FAX OVER IP

A business fax solution that allows users to make use of an Internet connection to transmit traditional fax messages.

Users are able to send and receive fax messages through the Internet (similar to VoIP) by connecting traditional fax machines to an IP network using an analogue terminal adaptor (ATA), thus eliminating the need for telephone lines. Fax messages are encrypted and sent with a full audit trail, and with the reliability of a standard telephone line.

The Unicorn ATA series is compact and compatible with any PSTN or cordless phones and fax machines. It offers the simplicity of plug and dial, making provisioning and installation a breeze.

BUSINESS BENEFITS

* Ease of use
* Standarised protocols
* Transparency
* Cost savings

FEATURES

* Full feature Voice/ Fax over IP
* Universal plug and dial
* Highly affordable and effective IP solution
* Superb sound quality
* Excellent performance and rich functionalities
