

# BACKUP AS A SERVICE

Easy & efficient backup of critical data.

## VEEAM CLOUD CONNECT

Veeam Cloud Connect makes it easy to get your backups off site to a hosted backup repository using a reliable, secure SSL connection. This eliminates the need for additional Veeam licensing or the cost and complexity of managing a second site.

Veeam's modern backup technology enables you to:

- access and recover data in hosted backup repositories, directly from the backup console
- track cloud repository consumption; and
- receive reminders for hosted storage renewals.

## CIPHERFASTFACT

Veeam Cloud Connect boasts more than 200 000 customers worldwide and protects over 13 million VMs.

The issue of compliance is something that many companies need to take into consideration. Encrypted data backup is required by regulation in all businesses that handle sensitive information in order to avoid heavy penalties. Veeam Cloud Connects eliminates compliance concern by using the simple 3-2-1 process.

### Package options

#### Option 1 (base offering)

- connect through shared internet bandwidth

#### Option 2

- direct point-to-point link to connect into Cloud Environment
